### Second, medical attention:

1. Please show your coupons when you register, so as not to affect your rights and interests, you can also speed up the registration of registered personnel.
2. On-site appointment registration, appointment with the doctor on the day of the outpatient visit.
3. If you are unable to come to the hospital after making an appointment, please cancel it by phone one day before, if there are three times in six months.  
Those who have not arrived at the clinic will be reopened after the first record has been recorded for more than half a year.
4. The newly diagnosed patient should fill in the initial medical information form and complete the procedure at the registration desk half an hour before the consultation time.
5. After the registration procedure is complete, refer to the scheduled consultation time to the consultation room according to the serial number. If the serial number has passed, please inform  
The nurse arranged for the number to see the doctor.
6. After the consultation, pay the registration fee and other fees. If you need to take the medicine, please check the prescription and check the prescription.  
At the time of consultation, if the number of patients is more than the number of consultations, the end time of each item will be extended.
7. The doctor will temporarily take a leave of absence, and the doctor will have a late arrival, and the announcement of each clinic will prevail.

8. If you apply for various types of certificates, please be sure to bring your ID card. If you are not related, you must bring another power of attorney.

9. For those who are insured as insurance, please be sure to bring your ID card and insurance certificate. Please submit the ID card to the nurse for medical records.

10. The receipt of this hospital can be declared to offset the comprehensive income tax.
